

Geotechnical Engineer(s)

Brisbane QLD

Full-time permanent position

SGME, a boutique consulting firm focusing on enhancing client satisfaction and delivering excellence was founded by a mine closure industry expert and professional soil scientist. Our team of scientists, engineers and professional experts engage with clients in the mining and minerals sector to deliver projects within a framework of structured practices which succeed in delivering innovative solutions to complicated challenges.

The role

We are looking for Geotechnical Engineer(s) with solid understanding and good experience to join our dynamic team focussing on engineering new environments. Reporting to the Discipline Lead, this exciting and permanent position(s) will contribute to projects and client deliverables all within a cohesive team environment.

Candidates must provide inspiring values of safety, quality, environment and ethical behaviours and have the ability to work collaboratively with other internal disciplines and external stakeholders with a particular focus on:

- Commitment and genuine passion and interest in the mining and minerals sector with a proven track record to manage and positively contribute to geotechnical engineering functions;
- Ownership, accountability and flexibility;
- Proactively participate in various stages of project development (feasibility through to closure and monitoring);
- Apply legislative compliance; and
- Deliver project tasks and activities in a timely manner to meet all deliverable timeframes, budgets and client needs.

About you

Tertiary qualified with 3-5 years' experience in relevant discipline with a good knowledge and understanding of mine life-cycle. Leverage your professional skills and proactively contribute to project delivery and innovative solutions. Collaborative approach with strong team commitment to engage with various disciplines, project managers, engineers, and scientists delivering simple to complex innovative solutions to our clients globally. Good knowledge of mine life-cycle that will enable you to amplify your skills and contribute to the overall journey of expansion at SGME.

Employee benefits

At SGME, we foster a culture of inclusivity, collaboration and creativity with a sense of purpose, engineering new environments. Along with a competitive salary we offer many other benefits to ensure your professional development and career growth are nurtured.

- Fantastic work life balance, 26 short weeks per year (nine-day fortnight);
- Generous learning and development framework with structured career development training programs;
- Mentoring for your own professional development;
- Dynamic work environment based in Brisbane with free parking;
- Work alongside industry experts within a diverse and collaborative team environment with passion;
- Competitive remunerational packages;
- Professional memberships;
- Employee assistance program;
- Recognition awards;
- Opportunity to work across disciplines to broaden your knowledge; and
- Work environment where you are supported and encouraged to be your best and work to your strengths.
